

Springton Primary School sowing the seeds of success!

On September 18, Springton Primary School is improving the learning environment for their students and the local environment for their community by participating in The Green Up Clean Up, Australia's most Eco-Logical School Fundraiser.

Students and staff will be raising money for their school by rolling up sleeves and getting their green thumbs dirty. They will be collecting rubbish and planting native trees to help the environment and give back to the community that supports them.

In addition, Springton Primary School is empowering their students to make a positive impact on climate change by giving every participant a 10 Point Environmental Action Plan aimed at creating sustainable change, in the home and school environment.

Mr Greg Brady, Event Co-ordinator at

Springton Primary School chose to conduct a Green Up Clean Up as it creates pride within the school and also helps teach the value of the environment and local community.

"School fundraising is so often dominated by junk food programmes, it's great to see this school seek such an educational and positive fundraiser for their community, they should be commended," said The Fundraising Group's Project Manager, Ms Katherine Smith.

Students will be busy seeking sponsorship from family, friends and members of the local community in a bid to help the school raise the required funds. Your efforts in support of the fundraiser will be vital.

The Fundraising Group provides healthy options to schools seeking alternatives to chocolate bar fundraising.
